Una storia fatta essenzialmente di passione e dedizione al lavoro, di scelte e innovazioni coraggiose grazie alle quali l'azienda ha saputo cogliere negli anni le opportunità offerte dall'evoluzione dei tempi e dei mercati diventando un punto di riferimento nazionale e internazionale nel mercato dei prodotti per il confezionamento dei regali, degli articoli per fumatori e dei tovagliolini monouso.

*In April 1914, with a letter in French, Saul Sadoch officially communicated the opening of his "trading firm, which will deal with import and export in general, and in particular the trade of paper, cardboard and all the articles related to this sector".*

# COLLEZIONE CARTA ERBA

## GRASS PAPER COLLECTION

Innovativa ed ecosostenibile, la linea si compone di carta e borse regalo realizzate con carta erba. Ottenuta dal 25% di fibre di erba essiccata e dal 75% di carta riciclata 100%, permette di risparmiare in fibra di cellulosa da legno e quindi di abbattere meno alberi e ridurre le emissioni di CO<sub>2</sub> lungo tutto il processo.

Caratterizzata da una leggera profumazione di fieno, ha un carattere e una struttura particolarmente naturale.

*Innovative and eco-friendly, this line is composed by gift wrapping paper and gift bags made from grass paper. This paper – made of 25% dried grass fibers and 75% of 100% recycled paper – allows to save wood cellulose fiber and therefore to cut fewer trees and to reduce CO<sub>2</sub> emissions throughout the whole process.*

*Characterized by a light scent of dried grass, it has a very natural character and structure.*

## GIFT WRAPPING GRASS PAPER

L'alta produttività delle macchine da stampa con tecnologia rotocalco si traduce in una grande capacità produttiva e flessibilità, con il risultato di un miglior servizio al cliente.

La carta regalo, prodotta da bobina di carta vergine a bobina stampata di migliaia di metri, viene poi trasformata in fogli e rotoli di varie dimensioni e confezionata in unità di vendita adatte per qualsiasi esigenza dei canali distributivi.

*The high productivity of the rotogravure printing technology allows high production capacity and consequently maximum flexibility in customer service.*

*The gift wrap paper is made of virgin paper and printed in jumbo rolls, then converted into sheets and rolls of different sizes and in any sales unit designed to suit the different needs of distribution channels.*

## GIFT WRAPPING PAPER

L'alta produttività delle macchine da stampa con tecnologia rotocalco si traduce in una grande capacità produttiva e flessibilità, con il risultato di un miglior servizio al cliente.

La carta regalo, prodotta da bobina di carta vergine a bobina stampata di migliaia di metri, viene poi trasformata in fogli e rotoli di varie dimensioni e confezionata in unità di vendita adatte per qualsiasi esigenza dei canali distributivi.

*The high productivity of the rotogravure printing technology allows high production capacity and consequently maximum flexibility in customer service.*

*The gift wrap paper is made of virgin paper and printed in jumbo rolls, then converted into sheets and rolls of different sizes and in any sales unit designed to suit the different needs of distribution channels.*

## GIFT WRAPPING PAPER

L'alta produttività delle macchine da stampa con tecnologia rotocalco si traduce in una grande capacità produttiva e flessibilità, con il risultato di un miglior servizio al cliente.

La carta regalo, prodotta da bobina di carta vergine a bobina stampata di migliaia di metri, viene poi trasformata in fogli e rotoli di varie dimensioni e confezionata in unità di vendita adatte per qualsiasi esigenza dei canali distributivi.

*The high productivity of the rotogravure printing technology allows high production capacity and consequently maximum flexibility in customer service.*

*The gift wrap paper is made of virgin paper and printed in jumbo rolls, then converted into sheets and rolls of different sizes and in any sales unit designed to suit the different needs of distribution channels.*

## GIFT WRAPPING PAPER

L'alta produttività delle macchine da stampa con tecnologia rotocalco si traduce in una grande capacità produttiva e flessibilità, con il risultato di un miglior servizio al cliente.

La carta regalo, prodotta da bobina di carta vergine a bobina stampata di migliaia di metri, viene poi trasformata in fogli e rotoli di varie dimensioni e confezionata in unità di vendita adatte per qualsiasi esigenza dei canali distributivi.

*The high productivity of the rotogravure printing technology allows high production capacity and consequently maximum flexibility in customer service.*
